Table of contents, volume 189, 1993

Number 1

V. Raghavan, J.C. Kamalay: Expression of two cloned mRNA sequences during development and germination of spores of the sensitive fern, *Onoclea sensibilis* L. 1

M. Petersen, E. Häusler, B. Karwatzki, J. Meinhard: Proposed biosynthetic pathway for rosmarinic acid in cell cultures of *Coleus blumei* Benth. 10

J.L. Weller, J.B. Reid: Photoperiodism and photocontrol of stem elongation in two photomorphogenic mutants of *Pisum sativum* L. 15

M.J. Hills, M.D. Watson, D.J. Murphy: Targeting of oleosins to the oil bodies of oilseed rape (*Brassica napus* L.) 24

W.G. Eickmeier, C. Casper, C.B. Osmond: Chlorophyll fluorescence in the resurrection plant *Selaginella lepidophylla* (Hook. & Grev.) Spring during high-light and desiccation stress, and evidence for zeaxanthin-associated photoprotection 30

A. Jähne, C. Fritzen, G. Weissenböck: Chalcone synthase and flavonoid products in primary-leaf tissues of rye and maize 39

W.M. Butler, A.C. Cuming: Differential molecular responses to abscisic acid and osmotic stress in viviparous maize embryos 47

S. Schaerer, P.-E. Pilet: Quantification of indole-3-acetic acid in untransformed and *Agrobacterium rhizogenes*-transformed pea roots using gas chromatography mass spectrometry 55

R. Vogelsang, W. Barz: Purification, characterization and differential hormonal regulation of a β-1,3-glucanase and two chitinases from chickpea (*Cicer arietinum* L.) 60

B. van Cleve, C. Forreiter, J.J. Sauter, K. Apel: Pith cells of poplar contain photosynthetically active chloroplasts 70

W. Becker, K. Apel: Differences in gene expression between natural and artificially induced leaf senescence 74

J.M. Ribaut, S. Schaerer, P.-E. Pilet: Deuterium-labelled indole-3-acetic acid neo-synthesis in plantlets and excised roots of maize 80

G.R. Hicks, M.S. Rice, T.L. Lomax: Characterization of auxin-binding proteins from zucchini plasma membrane 83

P.E. Taylor, K. Spuck, P.M. Smith, J.M. Sasse, T. Yokota, P.G. Griffiths, D.W. Cameron: Detection of brassinosteroids in pollen of *Lolium perenne* L. by immunocytochemistry 91

J.D. Timpa, B.A. Triplett: Analysis of cell-wall polymers during cotton fiber development 101

A. Taylor, C. Brownlee: Calcium and potassium currents in the *Fucus* egg 109

K. Schneider, B. Wells, E. Schmelzer, F. Salamini, D. Bartels: Desiccation leads to the rapid accumulation of both cytosolic and chloroplastic proteins in the resurrection plant *Craterostigma plantagineum* Hochst 120

T. Ootaki, N. Ishikawa, K. Konno, M. Todoriki, A. Miyazaki, H. Mihara: Analysis of growth and rotational behavior of sporangiophores in *Pilobolus crystallinus* (Wiggers) Tode 132

M.W. Hess: Cell-wall development in freeze-fixed pollen: Intine formation of *Ledebouria socialis* (Hyacinthaceae) 139

G. Öquist, N.P.A. Huner: Cold-hardening-induced resistance to photoinhibition of photosynthesis in winter rye is dependent upon an increased capacity for photosynthesis 150

B. van Cleve, K. Apel: Induction by nitrogen and low temperature of storage-protein synthesis in poplar trees exposed to long days 157

Number 2

E.B.-I. Monselise, D. Kost: Different ammonium-ion uptake, metabolism and detoxification efficiencies in two Lemnaceae. A ^{15}N-nuclear magnetic resonance study 167

U. Sonnewald, W.P. Quick, E. MacRae, K.-P. Krause, M. Stitt: Purification, cloning and expression of spinach leaf sucrose-phosphate synthase in *Escherichia coli* 174

E. Ögren, J.R. Evans: Photosynthetic light-response curves. I. The influence of CO_2 partial pressure and leaf inversion 182

J.R. Evans, I. Jakobsen, E. Ögren: Photosynthetic light-response curves. II. Gradients of light absorption and photosynthetic capacity 191

R.T. Besford, C.M. Richardson, J.L. Campos, A.F. Tiburcio: Effect of polyamines on stabilization of molecular complexes in thylakoid membranes of osmotically stressed oat leaves 201

K. Zambou, C.G. Spyropoulos, I. Chinou, F. Kontos: Saponin-like substances inhibit α-galactosidase production in the endosperm of fenugreek seeds. A possible regulatory role in endosperm galactomannan degradation 207

R. Môl, E. Matthys-Rochon, C. Dumas: In-vitro culture of fertilized embryo sacs of maize: Zygotes and two-celled proembryos can develop into plants 213

M. De Block, D. Debrouwer: Engineered fertility control in transgenic *Brassica napus* L.: Histochemical analysis of anther development 218

S.P. Long, W.F. Postl, H.R. Bolhár-Nordenkampf: Quantum yields for uptake of carbon dioxide in C_3 vascular plants of contrasting habitats and taxonomic groupings 226

D. Sültemeyer, K. Biehler, H.P. Fock: Evidence for the contribution of pseudocyclic photophosphorylation to the energy requirement of the mechanism for concentrating inorganic carbon in *Chlamydomonas* 235

M. Kreuger, G.-J. van Holst: Arabinogalactan proteins are essential in somatic embryogenesis of *Daucus carota* L. 243

D.H. Byrne, K.A. Seeley, J.T. Colbert: Half-lives of oat mRNAs in vivo and in a polysome-based in-vitro system 249

J. Narváez-Vásquez, V.R. Franceschi, C.A. Ryan: Proteinase-inhibitor synthesis in tomato plants: Evidence for extracellular deposition in roots through the secretory pathway 257

Z.-H. Yin, U. Heber, A.S. Raghavendra: Light-induced pH changes in leaves of C_4 plants. Comparison of cytosolic alkalization and vacuolar acidification with that of C_3 plants 267

A.S. Raghavendra, Z.-H. Yin, U. Heber: Light-dependent pH changes in leaves of C_4 plants. Comparison of the pH response to carbon dioxide and oxygen with that of C_3 plants 278

C.A. Peterson, E. Steudle: Lateral hydraulic conductivity of early metaxylem vessels in *Zea mays* L. roots 288

K. Kemp, J.G.C. Smali: Nitrate and nitrate reductase in *Erythrina caffra* seeds: Enhancement of induction by anoxia and possible role in germination 298

Number 3

N.Y. Abramycheva, M.V. Nesterenko, A.V. Babakov: Factors affecting the binding between fusicoccin and plasma membranes from maize roots 301

A.C. Allan, Y. Shachar-Hill, P.H. Rubery: The effects of calcium deficiency on *Cucurbita pepo* L. hypocotyl cells: a ^{31}P-nuclear-magnetic-resonance study 306

B. Nicander, U. Ståhl, P.-O. Björkman, E. Tillberg: Immunoaffinity co-purification of cytokinins and analysis by high-performance liquid chromatography with ultraviolet-spectrum detection 312

J.C. Morrison, L.C. Greve, P.A. Richmond: Cell wall synthesis during growth and maturation of *Nitella* internodal cells 321

P. Geigenberger, M. Stitt: Sucrose synthase catalyses a readily reversible reaction in vivo in developing potato tubers and other plant tissues 329

T. Lange, P. Hedden, J.E. Graebe: Biosynthesis of 12α- and 13-

hydroxylated gibberellins in a cell-free system from *Cucurbita maxima* endosperm and the identification of new endogenous gibberellins 340

T. Lange, P. Hedden, J.E. Graebe: Gibberellin biosynthesis in cell-free extracts from developing *Cucurbita maxima* embryos and the identification of new endogenous gibberellins 350

K.J. van Wijk, P.R. van Hasselt: Photoinhibition of photosystem II in vivo is preceded by down-regulation through light-induced acidification of the lumen: Consequences for the mechanism of photoinhibition in vivo 359

T.L. Hennessey, A.L. Freeden, C.B. Field: Environmental effects on circadian rhythms in photosynthesis and stomatal opening 369

I. Arif, I.A. Newman: Proton efflux from oat coleoptile cells and exchange with wall calcium after IAA or fusicoccin treatment 377

Y.-C. Wang, M.-M. Cordonnier-Pratt, L.H. Pratt: Temporal and light regulation of the expression of three phytochromes in germinating seeds and young seedlings of *Avena sativa* L. 384

Y.-C. Wang, M.-M. Cordonnier-Pratt, L.H. Pratt: Spatial distribution of three phytochromes in dark- and light-grown *Avena sativa* L. 391

G.B.S. Barcellos, L.M. Almeida, R.A. Moreira, B.S. Cavada, J.T.A. de Oliveira, C.R. Carlini: Canatoxin-, concanavalin A- and canavalin-cross-reactive materials during maturation of *Canavalia brasiliensis (Mart.)* seeds 397

A. Kliemchen, M. Schomburg, H.-J. Galla, U. Lüttge, M. Kluge: Phenotypic changes in the fluidity of the tonoplast membrane of crassulacean-acid-metabolism plants in response to temperature and salinity stress 403

K.A. Fairley-Grenot, S.M. Assmann: Comparison of K^+-channel activation and deactivation in guard cells from a dicotyledon (*Vicia faba* L.) and a graminaceous monocotyledon (*Zea mays*) 410

F. Loreto, T.D. Sharkey: On the relationship between isoprene emission and photosynthetic metabolites under different environmental conditions 420

P. Dörmann, F. Spener, J.B. Ohlrogge: Characterization of two acyl-acyl carrier protein thioesterases from developing *Cuphea* seeds specific for medium-chain- and oleoyl-acyl carrier protein 425

C. Schäfer, G. Vogg, V. Schmid: Evidence for loss of D1 protein during photoinhibition of *Chenopodium rubrum* L. culture cells 433

A. Neininger, J. Bichler, A. Schneiderbauer, H. Mohr: Response of a nitrite-reductase 3.1-kilobase upstream regulatory sequence from spinach to nitrate and light in transgenic tobacco 440

M. Fujie, H. Kuroiwa, S. Kawano, T. Kuroiwa: Studies on the behavior of organelles and their nucleoids in the root apical meristem of *Arabidopsis thaliana* (L.) Col. 443

A. Schmutz, T. Jenny, N. Amrhein, U. Ryser: Caffeic acid and glycerol are constituents of the suberin layers in green cotton fibres 453

T. Coronil, C. Lara, M.G. Guerrero: Shift in carbon flow and stimulation of amino-acid turnover induced by nitrate and ammonium assimilation in *Anacystis nidulans* 461

H. Sekimoto, S. Satoh, T. Fujii: Analysis of binding of biotinylated protoplast-release-inducing protein that induces release of gametic protoplasts in the *Closterium peracerosum-strigosum-littorale* complex 468

Number 4

C. Avila, A.J. Márquez, P. Pajuelo, M.E. Cannell, R.M. Wallsgrove, B.G. Forde: Cloning and sequence analysis of a cDNA for barley ferredoxin-dependent glutamate synthase and molecular analysis of photorespiratory mutants deficient in the enzyme 475

L.L. Flora, M.A. Madore: Stachyose and mannitol transport in olive (*Olea europaea* L.) 484

M. Tlałka, H. Gabryś: Influence of calcium on blue-light-induced chloroplast movement in *Lemna trisulca* L. 491

G.S. Ross, R.J. Redgwell, E.A. MacRae: Kiwifruit β-galactosidase: Isolation and activity against specific fruit cell-wall polysaccharides 499

D.S. Bush, A.K. Biswas, R.L. Jones: Hormonal regulation of Ca^{2+} transport in the endomembrane system of the barley aleurone 507

S.A. Coates, T. ap Rees: Carbohydrate oxidation by leucoplasts from suspension cultures of soybean (*Glycine max* L.) 516

F.J. Lechner, W. Rau: A complex pattern of changes in polysomal mRNA populations is evident in the leaves of *Arabidopsis thaliana* (L.) Heynh. during photoperiodic induction of flowering 522

R. Tischner, B. Waldeck, S.S. Goyal, W.D. Rains: Effect of nitrate pulses on the nitrate-uptake rate, synthesis of mRNA coding for nitrate reductase, and nitrate-reductase activity in the roots of barley seedlings 533

A.P. Hansen, T. Yoneyama, H. Kouchi, P. Martin: Respiration and nitrogen fixation of hydroponically cultured *Phaseolus vulgaris* L. cv. OAC Rico and a supernodulating mutant. I. Growth, mineral composition and effect of sink removal 538

A.P. Hansen, T. Yoneyama, H. Kouchi, K. Hiraoka: Respiration and nitrogen fixation of hydroponically cultured *Phaseolus vulgaris* L. cv. OAC Rico and a supernodulating mutant. II. Distribution and respiration of recently fixed ^{13}C-labelled photosynthate and the effect of sink removal on carbon partitioning 546

S. Shin, J.H. Wong, K. Kobrehel, B.B. Buchanan: Reduction of castor-seed 2S albumin protein by thioredoxin 557

C. Paulus, B. Köllner, H.-J. Jacobsen: Physiological and biochemical characterization of glyoxalase I, a general marker for cell proliferation, from a soybean cell suspension 561

A. Hager, M. Brich: Blue-light-induced phosphorylation of a plasma-membrane protein from phototropically sensitive tips of maize coleoptiles 567

C.N. McDaniel, L.-K. Hartnett: Floral-stimulus activity in tobacco stem pieces 577

Y. Sato, M. Sugiyama, R.J. Górecki, H. Fukuda, A. Komamine: Interrelationship between lignin deposition and the activities of peroxidase isoenzymes in differentiating tracheary elements of *Zinnia*. Analysis using L-α-aminooxy-β-phenylpropionic acid and 2-aminoindan-2-phosphonic acid 584

T. Saitou, Y. Tachikawa, H. Kamada, M. Watanabe, H. Harada: Action spectrum for light-induced formation of adventitious shoots in hairy roots of horseradish 590

S.D. Jackson, U. Sonnewald, L. Willmitzer: Characterisation of a gene that is expressed in leaves at higher levels upon tuberisation in potato and upon flowering in tobacco 593

I.J. Tetlow, K.J. Blissett, M.J. Emes: A rapid method for the isolation of purified amyloplasts from wheat endosperm 597
